

Park Marine Strata Corp. VR 97

#201 - -1930 Marine Drive
West Vancouver BC Canada
V7V 1J8

March 24 – 2012

To Whom It May Concern.

Park Marine is a 40 year old; ten story concrete strata suite building at the corner of Marine Drive and Nineteenth Street in Ambleside West Vancouver.

Park Marine is a self managed by owners building with an elected strata council who conduct all building matters on behalf of the owners.

In the spring of 2011 the owners voted to have some restoration repairs to the outside concrete coating and the building repainted. The concrete restoration repairs were soon found to be far greater than estimated and concrete restoration specialists, Passaglia Restoration & Repair Lt. were asked to quote and awarded the job to complete the major concrete coating repair to the building, taking three and a half months.

Park Marine and the owners would recommend Passaglia Concrete Ltd. as a very knowledgeable concrete company, well run, dedicated courteous employees with a requirement to perform to their maximum ability. We at Park Marine would recommend Passaglia Concrete to anyone who requires this type of service.

Regards

William J (Bill) Hughes

Council President
